

Reading Action Plan 2021-22/2022-23

Intent

1. At KNBS, we want to foster a culture of reading and make sure that in time, every student becomes a confident reader. We want to nurture a love of literature and for students to develop a life-long love of reading for pleasure. We want to ensure that teachers understand the importance of reading as a vehicle for all students to fully access the curriculum, and that they place value on the support that is put in place to enable progression in reading for all.
2. We are committed to working with stakeholders, including staff, students, parents, feeder schools and external SEND agencies, to ensure that we accurately identify students who are in need of intervention and that any interventions are conducted in a timely manner. We will deliver bespoke reading interventions to take account of students' entry points and work forensically to develop all areas of phonics and comprehension so that students can narrow the gap in their reading skills over time, and be able to fully access the whole of secondary curriculum, be able to perform in line with or above expectations, and to ensure that they are fully equipped for the rigour of post-16 education and beyond.
3. We want to ensure that leaders and teachers respond appropriately to diagnostic evaluations of students' reading capabilities and are equipped to be able to and committed to, in addition to bespoke intervention strategies, supporting students across the curriculum to develop their reading to be in line with age-related expectations and beyond.
4. We want to identify students' barriers to reading and we will endeavour to overcome them. In support of this, we are committed to investing the time, energy and resources that are required to embed deliberate reading practice across the curriculum and ensuring that all teachers are fully equipped to be able to do so.
5. We want to raise the profile of disciplinary literacy across the curriculum. Literacy and reading skills are both general and subject specific. We want all teachers to understand the important role that they play in developing students' abilities to become, for example, geographers or linguists or artists or historians, and how they can support students in learning how to read, write and communicate in their subjects. We want all teachers to be fully supported in teaching students the nuances of their disciplinary literacy.
6. We want to, over time, create a library space that is fully equipped to develop students' love of reading and support the reading of students of all abilities. We hope this space will become an integral part of the school curriculum and a valuable resource that can be used by teachers and students alike.
